SKILLS

ML & Data

PyTorch, scikit-learn, Hugging Face Transformers, LLM fine-tuning (LoRA), RAG, feature engineering, A/B testing

Engineering

Python, SQL, Spark, Airflow, Docker, Kubernetes, FastAPI, AWS SageMaker, MLflow, CI/CD

LANGUAGES

Italian - Native

English - Fluent (C1)

Spanish - Intermediate (B1)

EDUCATION

MSc Computer Science
Politecnico di Milano, 2014 - 2016
110/110 cum laude
Thesis: Graph neural networks for fraud detection

BSc Computer Engineering
University of Pavia, 2011 - 2014

CERTIFICATIONS

AWS Certified Machine Learning - Specialty (2023)

Deep Learning Specialization, Coursera (2019)

PROFILE

Machine learning engineer with 8+ years of experience taking models from prototype to production. I build ranking and LLM-based systems end to end, with a focus on latency, cost and measurable business impact.

EXPERIENCE

Senior Machine Learning Engineer Mar 2021 - Present
Zalando, Milan (hybrid)

- Led a team of 4 engineers building the LLM-based product search, serving 2M queries/day.
- Cut p95 inference latency from 480 ms to 120 ms with distillation and ONNX Runtime.
- Designed the RAG pipeline for customer support, deflecting 31% of tickets.
- Introduced offline/online evaluation with A/B tests, shortening model rollouts from 6 to 2 weeks.

Machine Learning Engineer Jun 2018 - Feb 2021
Satispay, Milan

- Built a real-time fraud detection model (XGBoost + graph features), reducing fraud losses by 22%.
- Moved training pipelines to Airflow and MLflow, making 40+ models reproducible.
- Served models with FastAPI on Kubernetes at 3k requests/s.

Data Scientist Sep 2016 - May 2018
Accenture, Milan

- Delivered demand forecasting for a retail client, improving forecast accuracy (MAPE) by 15%.
- Built churn models and dashboards for two telecom clients.

PROJECTS

- llm-eval-kit (open source, 1.2k GitHub stars): a library for evaluating RAG systems with LLM judges.
